Site Visit Checklist

Garden renovation at 14 Orchard Row

2026-10-21 · FS-SV-014

Before the visit

- [x] Confirm access times with the homeowner
- [x] Print the survey plan and planting schedule
- [ ] Charge the laser level and camera
- [ ] Pack soil test kit and sample bags

> **Warning**
> The rear boundary wall is unstable. Stay at least two metres from it until the structural engineer has signed it off.

On site

1. Walk the boundary with the homeowner and note any changes since the survey.
2. Photograph each bed from the marked viewpoints.
3. Take soil samples from beds A, C and F.
4. Mark existing plants to keep with orange tape.

> **Tip**
> Morning light shows drainage problems best. Look for standing water near the patio before 10am.

Planting schedule

Bed	Plant	Qty	Spacing (cm)
A	Hakonechloa macra	12	40
A	Geranium Rozanne	9	50
B	Betula utilis (multi-stem)	1	n/a
C	Astrantia major	15	35
C	Persicaria amplexicaulis	7	60
D	Hydrangea arborescens	3	90
E	Ferns, mixed native	20	30
F	Thymus serpyllum	40	20

After the visit

- [ ] Upload photos to the project folder
- [ ] Send soil samples to the lab
- [ ] Update the planting plan and share it with the client
